

# Bar Boot

Rebar Accessories

## Technical Data Sheet

### Description:

Bar boots are an easy and quick way to support and space rebar cage installations vertically at the base of drilled holes or shafts.

### Application:

The bar boot supports and can hold the whole rebar cage vertically and provide proper spacing between the rebar cage and the ground surface. They can also be used within caisson ring for the same purpose.

### Product Specifications:

- Rigid rebar attachment
- Can be used for sizes #3 - #11

### Benefits:

- Supports cages with few parts
- Installation requires no tools
- Ensures proper installation
