

End Spacer

Rebar Accessories

Technical Data Sheet

Description:

Rebar end spacers are developed to create a protective overlapping for rebar ends in vertical or horizontal applications.

Application:

The Rebar End Spacers can space rebar on either a 1" or 1 1/2" length from the sides of forms. To prevent surface rust on the finished concrete from corrosion or other construction chemicals. Solid design and material allow the Rebar Spacers to withstand heavy loads and applications.

Product Specifications:

- Can withstand heavy loads
- Available in 1" and 1 1/2" cover

Benefits:

- Prevents surface rust
- No tools required
- Fast installation
