

# Stakes

Rebar Accessories

## Technical Data Sheet

### Description:

Stakes are used in footers to hold rebar off of the ground to allow for proper coverage of concrete.

### Application:

Stakes are hammered into the ground to provide support for rebar and allow for different clearances at 9", 11", 13", and 16.5".

### Product Specifications:

- 18" long
- Max bar size #5
- Used in footings

### Benefits:

- Available in plastic and metal
- Easy installation
- Greater stability
